WORK HISTORY

Full Stack Software

Engineer Consultant

Pet Plan Insurance

October 2017 - Current

- Developing web applications, in **Laravel 5.5** and **Drupal 8** with **MySQL** and **Angular JS** to generate front end templates and components.
- Data architected and developed API layer that supplies data to the Medical review process web application, and Veterinarian Portal.
- Developed the Medical Review Process that allows owners to register pets with a Veterinarian of their choosing, supplying detailed information of their pets including specific medical conditions and medications.
- Developing Drupal websites to support marketing initiatives.

PHP/Wordpress Consultant

Lendkey Technologies, Inc.

Apr. 2017 – Aug. 2017

- Developed B2B and B2C **Wordpress** platform (lendkey.com and business.lendkey.com). Effective coordination of launch led to successful release of marketing initiatives to drive leads.
- Created a local development environment with Vagrant, to reduce setup time for future developers.
- Lead Development Operations to launch the redeveloped, B2B and B2C Lendkey sites.
- Designed features to enhance user experience; effective partnership with design and marketing teams ensured that stakeholder vision was translated to the end users.

Senior Developer

Sentient Interactive

Apr. 2016 – Apr. 2017

- Engineered secure web applications and backend solutions, with **Laravel**, **Lumen**, and **Wordpress** for clients with sensitive user data, leveraging cutting-edge security and encryption methodologies; led to increased client satisfaction and retention
- Built reusable front end components to speed up development time across projects with similar architecture.
- Ensured consistent on-time delivery of projects through effective leadership of Design, Account and Tech teams
- Increased development team efficiency and decreased ramp-up time for new developers by creating technical documentation which provided guidance for potential issues concerning architecture and development
- Mentored Junior/Mid-Level Developers and helped with building a culture of open communication and teamwork.

Software Engineer

Mediabistro Holdings

Dec. 2015 – Mar. 2016

- Drove subscription sales by designing custom checkout features to extend **Woocommerce** functionality and 'Product Switch' feature that updated user's' subscription based on purchase history

- Enhanced user experience by minimizing JS and CSS to optimize theme performance; updated HTML and CSS for cross-browser compatibility and applied PHP and Wordpress security standards to secure theme and **MYSQL** database.
- Delivered successful on-time launch of mediabistro.com by effectively working cross-departmentally to ensure alignment with key stakeholders.

Software Engineer

CBS Corporation

Sept. 2012 – Dec. 2015

- Developed new features and re-built ad interface for **Wordpress** multisite, *cbslocal.com*, and **Python** API *Audio Roadshow* service. Effective development of custom Wordpress plugins and shortcodes, and integration of internal and third party APIs led to increased ad revenue
- Increased client retention and revenue through efficient code review of team members to ensure high coding standards of deployed products.

API Developer

Tincan RV

Mar. 2015 – Nov. 2016

- Built robust API using PHP **Laravel 5.0** framework to power RV ride sharing app; successfully reflected key business needs in the app through effective supervision of front end developer and assessment of business needs
- Developed unique interface with **Amazon Web Services** and **Stripe API** to host and store user and vehicle data, and to create a custom payment flow; resulted in enhanced user experience for renting vehicles and purchasing additional services
